**Deadline:** Open until Further Notice

### **Program Director Complete Streets**

The Office of Transportation and Infrastructure Systems for the City of Philadelphia is currently seeking to fill an exciting leadership position, Program Director for Complete Streets. This position is involved with the expansion of programs and initiatives that have a direct impact on safety throughout the city's transportation systems. A key role of the position will be coordination of key citywide stakeholder groups. The Director will assure that all street projects, programs and maintenance incorporate concepts and strategies that promote safety across all modes of transportation in support of the vision of zero traffic fatalities. This work includes coordinating various agencies to assure implementation of Complete Streets policies and practices; develop and adopt performance measures; and improve return on investment from transportation projects across a number of criteria including economic, health & safety, equity, and environmental measures.

The Director reports to the Deputy Managing Director and will lead a team of professionals engaged in efforts to drive change that will ultimately lead to safer and more fully multimodal streets, especially for pedestrians and other vulnerable users.

### **Experience**

The candidate should have an excellent knowledge of complete streets and safety practices and strategies; the ability to work with diverse groups; excellent communication and analytical skills, and the ability to organize effectively to manage multiple initiatives. A bachelor's degree in engineering (i.e. civil, electrical, construction, etc.), city planning or related field is required along with five years of experience in a related position. The possession of a current PE or AICP Certification is strongly desired. Salary is commensurate with experience; please include your salary requirements.

**Those interested should submit a cover letter and resume to:**
