President's Message for May 2024

I am in a strange position. My term as President of the Philadelphia Chapter of the PSPE for the 2023-2024 year is coming to an end. At the same time, my term as President of the Philadelphia Chapter of the PSPE for the 2024-2025 year is about to begin.

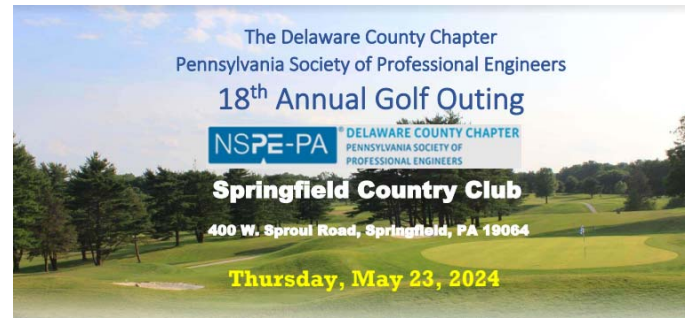

The Chapter this year has a lot to show for itself thanks to the tireless efforts of its steadfast members: The Outstanding Engineering Achievement competition was successful with Pennoni voted as our winner for their presentation on the PennDOT I-95 Rebuild, the Chapter planned and hosted a successful 24 PDH BootCamp for those in need of some last minute education, we toured the Aero Aggregates facility to experience and learn about the engineering that went into the material used to support the temporary lanes on I-95, and there were many other good seminars to expand our engineering knowledge. So much has happened that I could not recall it all. Luckily for me, our website at www.pspe-philly.org/ is chock-full of our history and efforts. In fact, the PSPE has awarded our Chapter the Outstanding Chapter Communications Award for 2023 at the state level!

In addition to the Chapter program events, the Chapter continued to support local and national recognition of engineering and STEM in the form of the MATHCOUNTS competition (a shout out to Abe El for his tireless and continued efforts) and the Chapter's week-capping banquet at the Chart House Restaurant (a shout out to immediate past-President Tom Friese) as part of the Delaware Valley Engineer's Week (eWeek) Events.

As I prepare for a seamless transition between my two terms in the office of President, I am thinking about the future of the Chapter. The Chapter has a long history, actually pre-dating the formation of the state society. But, of late, our membership is dwindling and the dedicated efforts of our active members are stretched thin. If you are an engineer, you benefit from the Chapter and National and State societies (even if you are not licensed) and if you live in modern society, you benefit as well from a solid engineering workforce and that a licensed engineer has proven education, training, and experience. There are more benefits, but the question is: Do you value these things? If you do, will you volunteer some of your time to continue the good works of the Philadelphia Chapter of the PSPE? If so, please join us and help us to continue our good works, not just for the profession, but for the residents of southeastern Pennsylvania.

As I sit here writing this message on a Sunday morning in April, it occurred to me that when I first joined PSPE and NSPE almost twenty years ago, I naively thought that they were government organizations. It did not take long to realize that these societies are run by engineers, for engineers, and all about engineering with a strong desire to help others. Like other societies, they are as strong as their members. On behalf of the Chapter and myself, I sincerely hope that you are successful in your endeavors and I invite you to join us in our upcoming events.

Sincerely, Bob Cargill, PE
